Central High School

Memphis, TN

G.P.A. 4.0.

Aug 2012 - May 2016

CodeCrew Code School

Memphis, TN

Coding Bootcamp: Full Stack Software Development

Feb 2020 - July 2020

PROJECTS

Digimon Search App - Web Based Application

React + NodeJS

<https://github.com/bdavis171/Digimon-Search-App>

- Created a search application that allows users to search for a digimon by either their name, generation, or attribute.
- Implements a self-made API containing 55 different digimon to search for.

Pokemon Battle - Game Based Application

HTML + CSS + Javascript

https://github.com/bdavis171/Coding_Projects/tree/master/pokemon-battle-1

- Created a game application using JavaScript and HTML/CSS.
- Allows users to click one of four buttons to command Typhlosion to attack Blastoise and try to defeat it.

Cash Register Simulation - Text Based Program

C++

https://github.com/bdavis171/Coding_Projects/blob/master/cash_register.cpp

- Created a text-based, simulation program using C++.
- Allows users to enter in the number of items a customer has, the price for each, and returns the subtotal and total of the order.
